Subject-To Apply for a job vacancy

Dear Richy,

Hello Richy nice to see you and hope you doing well.We met john's birthday party and we had a conversation about marketing compaign and I remembered that you were seeking a person for designing position and I am Also interesting about to join it

I made a decition to resign my previous job and I think it would bew a great decition for me.because there is an unfavourable work environment and I don't prefer it .and also my salary is not sufficient for my work experience and my carrier skills and my achivements.my company boss is not a good one for this company because he can't manage the thing on the company correctly by himself.so we can't work with him.

So I have resolved to embark on a new chapter in my carre life.i want to know about is still available that grapic designing position in your company,as I mentioned earlier in our informal discuttion.i am the best person foe this position because of my 10 years filed work experience and my skills in industry

Although I have plans for a vacation before connect with this jobbut as soon as I am willing and able to connect with work immedietly after my vacation. Please find my attached resume for your perusal.actually I want to join your team and express my skills with all you and willing to see your company success.

If your require any information plase regard contact with me via email.

Thank you for considering my application. I eagerly anticipate the possibility of working with your esteemed organization.

Sincerely,

Peter

Question number 2

This two pie chart show us to the comparison of energy production of australia in two different years.this energy production include Petro,Nuclear,coal,Gas and other

The first pie chart show us in 1997 one of energy production details and the second pie chart show us in 2005 another energy production details. comparing to these charts the most Presentage of including thing is coal in these two different years.in 1995 it's 29.80 presentage and in 2005 it's 30.93 presentage.In 1995 29.80 presentage of coal including first pie chart and In 2005 30.93 presentage of coal including second pie chart.in 1995 6.40 presentage of Nuclear including first energy drink and in 2005 10.10 presentage of Nuclear including second energy drink.the rest of other things's presentage in first pie chart show us 4.90 presentage in 1995 and comparison to this in 2005 it's presentage is 9.10 .in 1995 gas presentage is less than the presentage of second energy drink's presentage.overall comparing to these information first pie chart presentage is overall very less than the second pie chart presentage. comparing to these charts the least Presentage of including thing is other things in these two different years.
